Welcome to our mental math worksheets for the development of fast and accurate mental arithmetic skills. This page contains links to our collection of worksheets to help your child improve their mental calculation and problem solving skills and learn your math facts. We also have to do with our mathematical fact resources and online practice zones to help develop mental arithmetic. This page contains links to other math websites where you will find a range of activities and resources. If you can't find what you're looking for, try searching your site using the Google Search Box at the top of each page. The best way to improve your mental arithmetic is by exercising regularly. Even 5 minutes of daily exercise can make a big difference in a few weeks. Below you will find links to many different websites containing worksheets of mental mathematics, as well as mental arithmetic sheets for each of the 4 operations: adding, subtracting, multiplying and dividing. There are also some links to math games that can be printed and played at home and watch your child progress. Here you will find a series of printable quizzes in mental mathematics to help your child revise their math facts and problem-solving skills. Tests/quizzes are perfect for general practice or for maintaining sharp skills. Each quiz tests children on a range of mathematical topics from numerical facts and mental arithmetic to geometry, fraction and measure of questions. A great way to revise topics or use it as a weekly math quiz! Here you will find a series of printed worksheets of mental maths for children in the UK to enjoy. Language and math skills have been adapted to support learning for primary school children. Mental arithmetic resources Here you will find our selection of free resources such as flashcards and 100 squares to help the child count and learn their additional facts. Number bonds Here you will find a selection of a number of bond sheets designed to help your child improve their recall of their number of bond facts. In our practice of numerical bonds, you can practice your numerical bonds to different numbers. Test your bond numbers at 10, 20, 100 or even 1000. You want to try decimals – you can do it too! Select the numbers you want to practice from, and print the results when you're done. You can also use the practice zone to compare your performance or use it with a group of children to measure progress. Number of Bonds Practice Zone Number Bonds at 10 and 12 Number Bonds on 50 and 100 Supplement Mental Math Sheets Here you will find a selection of mental math worksheets designed to help your child improve their recall supplement facts. Here is our online zone for adding math learning, where you can practice a series of calculations. Test yourself at the following facts: up to 5+5, 10+10, 20+20, 50+50, 100+100 or 1000+1000; 2 digits of numbers that add those; 2 digits of numbers that add dozens; 3 digits of numbers that add hundreds; Here is our free plugin plugin generator This simple generator will create randomly generated additional worksheets for use. Each sheet comes complete with answers if necessary. Areas covered by the generator include: addition to numbers up to 10, 15, 20, 50, 100 and 1000; add-on for 10s with double digits; addition by 100s with 3 digit numbers; add with numbers up to 10 with one decimal place; add with numbers to 1 with 2 decimal places. These generated sheets can be used in a number of ways to help your child learn the facts about adding. Free worksheets to add (randomly generated) Here you will find a selection of worksheets from mental mathematics designed to help your child improve their addition to a total of 10. Using these sheets will help your child learn: add numbers up to a total of 10. Add math worksheets to 10 Here you will find a series of mental math worksheets designed to help your child learn their facts about adding to 12 + 12. Here you will find a series of add-on sheets designed to help your child learn your facts about adding to 20 + 20. Math Supplement Facts on 20 Next Mental Math Worksheets develop children's exercise knowledge of their supplement facts up to 100+100. Third Class Addition Facts Worksheets on 100+100 The following sheets develop a child's understanding of place values and decimals, as well as applying their adding knowledge of facts in order to elaborate their decimal added facts. Subtract the fact sheets Here you will find a selection of mental confiscation sheets designed to help your child improve the recall of confiscation facts. Here is our online learning maths subtraction area where you can test yourself on your confiscation skills. Test yourself on the following facts about confiscation: up to 10, 15, 20, 50, 100, 200, 500 or 1000; 2 digits subtract those; 2 digits subtract tens. Three digits take away hundreds. Zone of confiscation practice Here is our free generator for dispossession of worksheets. This simple generator will create randomly generated forfeiture worksheets for use. Each sheet comes complete with answers if necessary. Areas covered by the generator include: subtraction with numbers up to 10, 15, 20, 50, 100 and 1000; subtraction for 10s of 2 digits of numbers; subtraction for 100s of 3 digits of numbers; subtraction with numbers to 10 with one decimal place; subtracting numbers to 1 with 2 decimal places; deduction that includes negative numbers. These generated sheets can be used in a number of ways to help your child learn the facts about adding. Free confiscation worksheets (randomly generated) Here you will find a selection of confiscation sheets designed to help your child learn their facts about subtraction by 10. Here you will find a series of free sheets for subtraction of the first which can be printed, and are designed to help your child learn their facts about subtracting by the age of 12. Addition of first class and subtraction up to 12 Here you will find a series of sheets for subtraction of the second degree that can be printed, and are designed to help you take the child their facts of confiscation to the 20th century. Subtract the facts for the 20 worksheets The following sheets develop the knowledge of children about their facts of confiscation up to 100. Third-grade worksheets of subtraction on 100 The following sheets develop a child's understanding of place values and decimals, as well as the application of their knowledge of the facts of confiscation in order to elaborate their decimal facts about subtraction. Subtracting Decimals Worksheets (Mental) Multiplication Times Table Sheets Here you will find a selection of mental multiplication sheets designed to help your child improve their mental recall multiplication facts and learn their timetables. Here is our online learning zone of mathematical practice for facts about multiplication. Using this zone is a great way to test your facts and see how many you can do in a minute. Then test yourself again and see if you can improve your score. Using this zone, you can: select tables up to 5x5, 10x10 or 12x12 to be tested; select one or more tables to test yourself for; practice to multiply in full numbers by 10 or 100. Online multiplication zone Here is our free generator for multiplying worksheets. This simple generator will create randomly generated multiplication worksheets that you can use. Each sheet comes complete with answers if necessary. Areas covered by the generator include: Multiplied by numbers up to 5x5; Multiplied by numbers to 10x10; Multiplied by numbers to 12x12; Practicing a disposable table; Practice selected time tables; These generated sheets can be used in a number of ways to help your child learn the time table. Times Tables Worksheets (randomly generated) As your child progresses through the ratings, they will learn the multiplication table to 5x5 and finally to 10x10 or 12x12. Once they learn their facts about multiplication, they can start learning related facts, eg if $3 \times 4 = 12$, then $30 \times 4 = 120$ and $\$ 300 \times 4 = \$ 1200$. Math Times Worksheets These multiplication worksheets below are designed to help your child improve their ability to multiply a series of numbers with multiples of 10 and 100 mentally. Multiplying with multiples of 10 and 100 of these multiplication tables below includes children using multiplication table facts to answer related questions involving decimation. Multiply decimals with Integer Department fact sheets Here you will find a selection of mental division sheets designed to help your child improve their recollection of Department facts and apply their facts to answer related questions. This is our free-department training area. If you want to practice your facts about division or do a time-consuming split test, then this is the place for you. In this area we cover the following facts of division: facts about the division up to 5x5, up to 10x10 or up to 12x12; the division of facts relating to the facts of the divisions by 10 and 100. Here's our free generator for the department's worksheets. This easy-to-use generator will create a randomly generated division of for you to use. Each sheet comes complete with answers if necessary. Areas covered by the generator include: Dividing with numbers to 5x5; Split with numbers to 10x10; Sharing with numbers on 12x12; Sharing with one table of times; Practice division with selected gallows; These generated sheets can be used in a number of ways to help your child learn the table divide. Division Facts Worksheets (randomly generated) Here you will find a selection of Department sheets designed to help your child learn to use their Department facts up to 10x10 to answer related questions. Example: if you know that $42 \div 6 = 7$, then you also know that $420 \div 6 = 70$ or $420 \div 70 = 6$, etc. Dividing by Multiples of 10 and 100 Worksheets Math Fact Games Here you will find a series of free mathematical facts that can be printed. The following games develop a range of mental math skills in a fun and motivating way. The use of these sheets will help your child to: learn their mathematical facts; develop your strategic thinking skills. How to print or save these sheets Need help printing or saving? Follow these 3 simple steps to print your worksheets perfectly! How to print or save these sheets Need help printing or saving? Follow these 3 simple steps to print your worksheets perfectly! Math Salamanders hope that you will enjoy using these free mathematical worksheets and all our other mathematical games and resources. We welcome any comments about our site or worksheets on the Facebook comment box at the bottom of each page. Page 2 Welcome to our 2-digit multiplication worksheets page. We have many worksheets on this page to help you practice plural double digits skills with 1 or 2 digits. We divided the worksheets on this page into two sections: double-digit x 1-digit multiplication (3rd grade) double-digit x double-digit (4th grade) Each section ends with some heavier challenge sheets for more capable students. Within each section, the sheets are carefully evaluated with the easiest sheets. These sheets are intended for third-grade students. Sheets 1 through 4 consist of 15 problems; sheets 5 and 6 consist of 20 problems. Sheets 1 and 2 include multiplying double digits by 2, 3, 4 or 5. Sheets 3 through 6 include multiplying double digits with single digits and finding increasingly difficult products. These double-digit multiplication worksheets are designed to make students more capable of needing this additional challenge! These sheets are intended for students 4. Leaf 1 double-digit double digits with smaller numbers and answers up to 1000. Sheets 2 to 4 have heavier double digits for multiplier and responses that are generally greater than 1000. These double-digit multiplication worksheets are designed for able students who need this additional challenge! We have multiple double-digit worksheets to multiply, including double-digit x 3-digit multiplication problems on this page. More double-digit multiplication worksheets (harder) See some more of our worksheets similar to these. Need to quickly and easily create your own long or short worksheets for multiplication? Our multiplication worksheet generator will allow you to create your own custom worksheets for printing, along with replies. Here you will find a series of Multiplication worksheets to help you become more fluent and accurate with your tables. Using these sheets will help your child: learn their multiplication tables up to 10 x 10; understand and use different multiplication models; solve a number of multiplication problems. All free third-grade math sheets in this section are informed by the Basic Mathematical Criteria for 3. Here you will find a series of multiplication games that can be printed to help children learn their multiplication facts. Using these games will help your child learn their facts about multiplying to 5x5 or 10x10, as well as to develop their memory and strategic thinking skills. Multiply math games How to print or save these sheets Need help printing or saving? Follow these 3 simple steps to print your worksheets perfectly!
